About

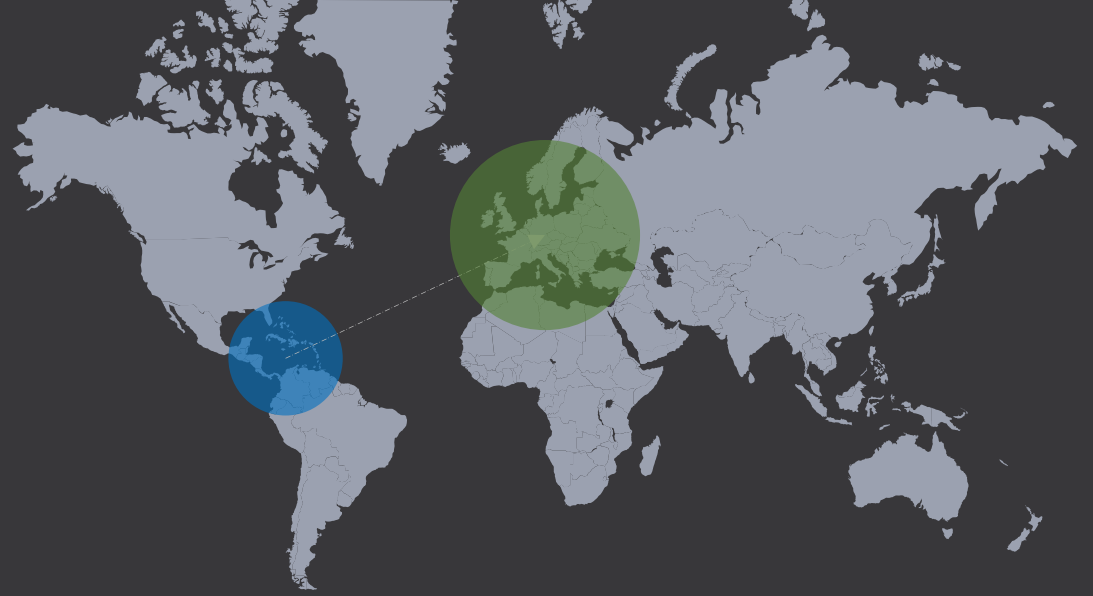
UNIVERSIS ASSET MANAGEMENT

International Platform for Development, Project Management and Strategic Coordination

Universis Asset Management is an international platform specialized in the **identification, structuring, development and integrated management** of high-value real estate and urban development projects.

The platform integrates **operational capabilities, technical teams and strategic partners** to coordinate residential, hospitality, mixed-use, urban planning and special asset projects.

With a multidisciplinary network of **developers, architects, operators and specialized managers**, Universis Asset Management acts as a coordination and execution hub across Europe, Central America and other strategic markets.



Strategy & Development Approach

Universis operates through a **flexible and integrated platform model**, coordinating technical teams, operators and specialized co-managers depending on the nature of each project.

- **Opportunity sourcing and project structuring**
- **Active development and execution management**
- **Integrated coordination across all project phases**
- **Focus on residential, hospitality and mixed-use assets**
- **Institutional approach with scalable execution capacity**

Platform Structure & Governance

Universis Asset Management operates as an **integrated project development and management platform**, coordinating internal teams, strategic partners and specialized co-managers across each project.

- **Central coordination** by Universis Asset Management.
- **Specialized partners** by sector and project phase.
- **Clear governance** between development, execution and commercialization.
- **Flexible structure** depending on asset type, market and project

Operating Model & Control Architecture

Our operating model is based on **active project management**, combining strategic oversight with specialized execution capacity.

- Project-by-project management structure.
- Technical, legal and commercial coordination.
- Dedicated co-managers for key workstreams.
- Integrated reporting, execution monitoring and decision control.

Key Capabilities of the Platform

Universis Asset Management brings together a **multidisciplinary ecosystem** of companies, operators and professionals with proven experience in real estate development.

- +25 years of combined experience.
- Residential, hospitality, mixed-use and urban planning expertise.
- International network of strategic partners.
- Capacity to structure, coordinate and execute complex projects.

About

UNIVERSIS ASSET MANAGEMENT

Examples of Vertical Execution Capacity

Universis Asset Management brings together specialized partners, operators, co-managers and senior professionals with extensive experience across multiple real estate and operational verticals.

The platform is structured to work **together with these partners**, many of whom form part of the same project vehicle or operating structure, while others participate as specialized co-managers depending on the nature of each project.

Each project is coordinated jointly with experienced development, operational and strategic partners, combining technical execution, project management, commercial strategy and operational oversight across residential, hospitality, mixed-use, urban planning and complex real estate developments.

These structures are designed to ensure alignment between all parties, execution capacity and coordinated decision-making throughout the full lifecycle of each project.

Examples of Platform Execution Capacity by Vertical

- **Alternative & Strategic Partners**
Partners, managers and co-sponsors within the platform ecosystem have coordinated more than **€2.5Bn** across multiple sectors and projects during the last five years.

- **Real Estate & Hospitality Operators**
Combined ecosystem with more than **€30Bn AUM** across partners, operators, managers and co-sponsors connected to the platform.

- **Residential, Commercial & Hospitality Assets**
Operational exposure across more than **50,000 residential, commercial and hospitality units and properties** through partners, managers, co-sponsors and companies participating in the platform.

The result is an integrated operating platform where Universis Asset Management coordinates and works alongside specialized partners, many of them embedded within the project structure, to develop, manage and execute complex real estate projects with institutional discipline and scalable execution capacity.

Controlled Execution & Operational Safeguards

To ensure disciplined project execution, operational scalability and institutionally-aligned governance standards, the platform applies the following mandatory operational criteria across its projects and operating structures:

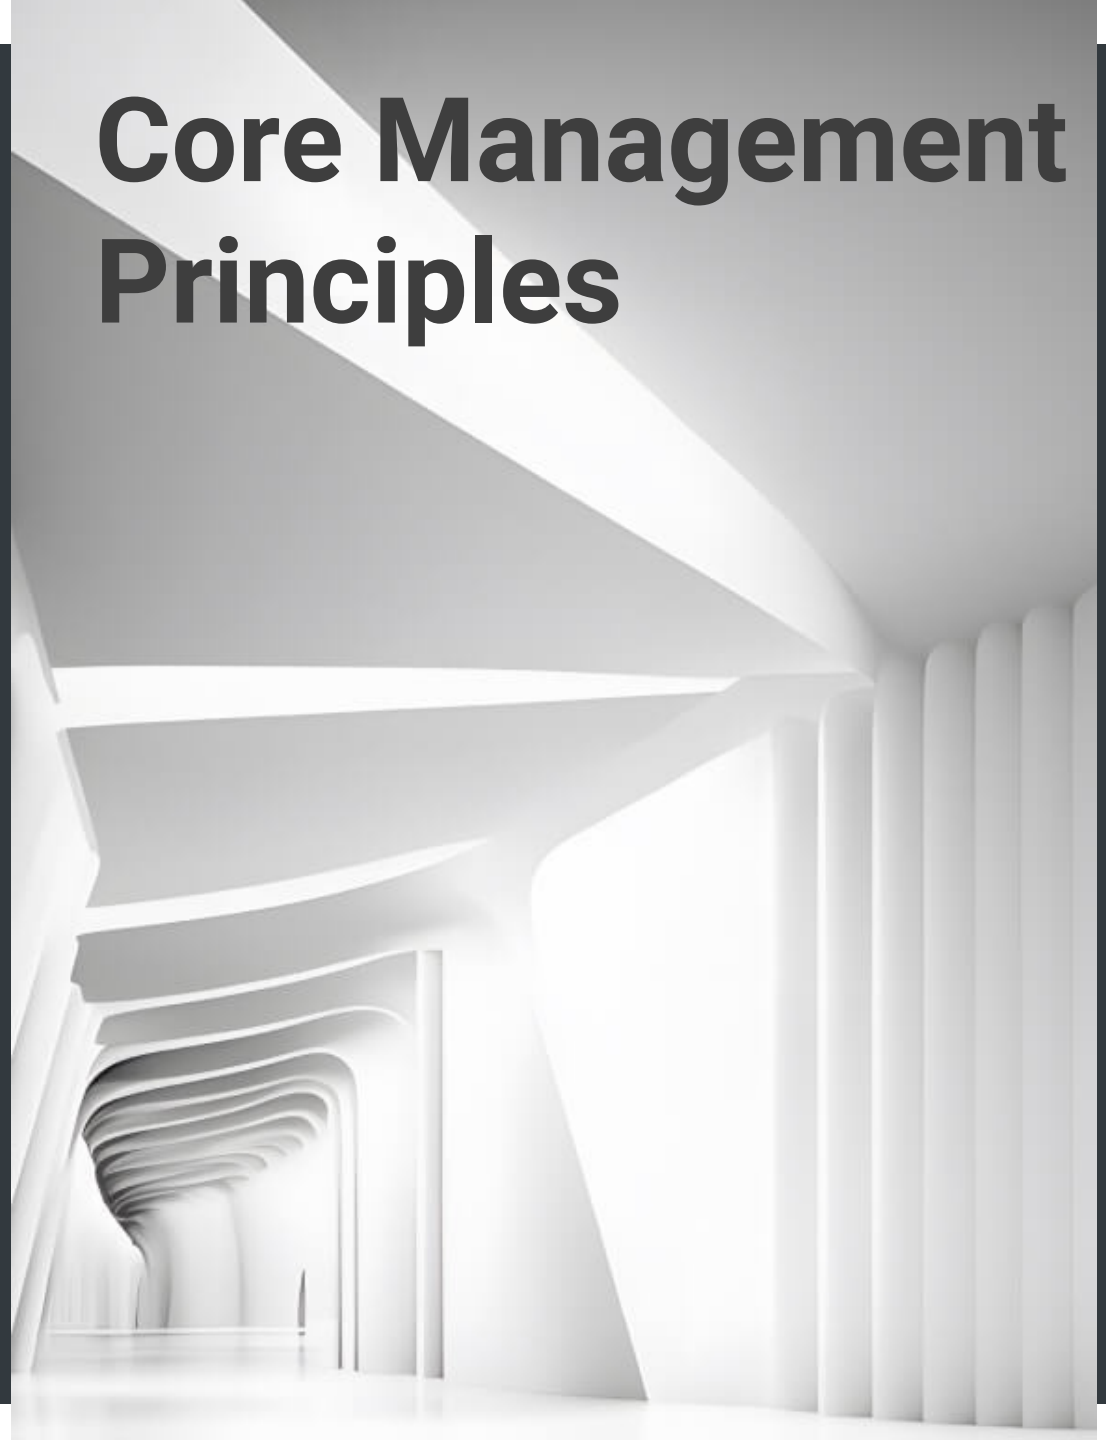
- **Technical, legal and market feasibility assessments** prepared by top-tier international consultants such as **CBRE, Colliers or equivalent firms**, together with leading market specialists and brokerage platforms such as **Gilmar**, when required for commercial validation, absorption analysis and market positioning. Historically, this operating approach has demonstrated a success ratio above **95%**.
- **Asset-backed project structures** supported by tangible underlying assets, including real estate assets, productive land, operating rights and other strategic collateral components depending on the nature of each project.
- **Market analysis, absorption studies, demand validation and risk assessment**, coordinated by the responsible managers and specialized teams within each vertical.
- **Full legal and contractual formalization** of all structures and agreements, with complete operational traceability, supported by firms such as **Baker McKenzie** or **Andersen.**.
- **Segregated operational structures and dedicated project accounts** associated with each SPV or project structure, ensuring transparency, operational control and coordinated execution oversight throughout the full project lifecycle.

Complementary Control Mechanisms

01 Project-level governance
Dedicated coordination and approval process for each SPV or project structure.

02 Independent validation
Technical, legal, commercial and market checks before execution.

03 Execution monitoring
Ongoing reporting, cost control and milestone-based oversight throughout the project lifecycle.



Core Management Principles

Universis
Asset Management

01

Security — Tangible Assets

We focus on real assets and project structures backed by tangible underlying value, including real estate, land, operating rights and income-generating assets with long-term potential.

02

Transparency

We operate as committed project partners, prioritizing execution discipline, operational simplicity and full visibility for all stakeholders throughout each project lifecycle.

03

Returns

Our approach is designed to create stable value and long-term sustainable returns through disciplined project selection, active management and responsible execution.

04

Diversification

We build diversified project exposure across sectors, asset types and locations, combining strategic partnerships, specialized operators and structured financing to support growth while maintaining disciplined risk management.

Priority Sectors

CAPITAL DEPLOYMENT

The investment strategy is focused on sectors with high stability, strong visibility and disciplined project selection.

Capital deployment is structured through **highly specialized verticals**, each led by experienced managers and operators within their respective fields. These verticals are built on robust platforms designed to ensure efficient execution, professional management and operational control.

- Teams with a proven **track record** and sector-specific expertise.
- Detailed feasibility plans and market studies based on validated models.
- Strategic partners with technical, financial and commercial capabilities.
- Clear legal, fiduciary and operational structure.
- Asset-backed execution frameworks where required.

Each vertical is structured through dedicated project vehicles, allowing clear segmentation of risk, transparent capital flows and direct control over execution and management.

Universis
Asset Management

Main Sectors

Strategic Verticals & Project Types

The following section outlines the platform's main management verticals. Each vertical may be structured through project-specific vehicles, either on an individual project basis or by asset class, enabling clear risk segmentation, transparent capital flows and direct oversight of management and execution.

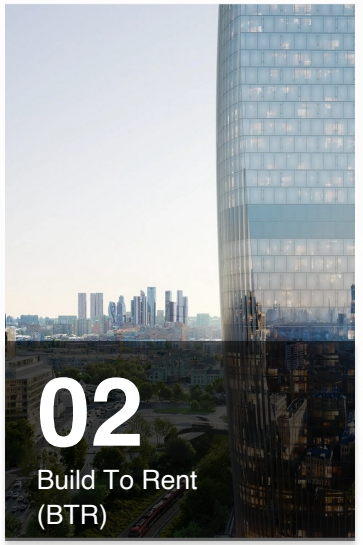
Tangible guarantees:

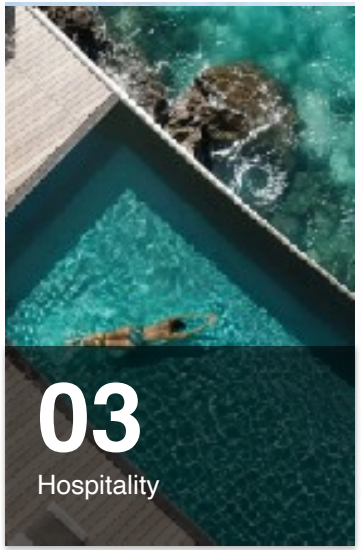
Projects are supported, where applicable, by underlying assets, operational rights, contractual guarantees or other security mechanisms, ensuring traceability, control and disciplined project execution.

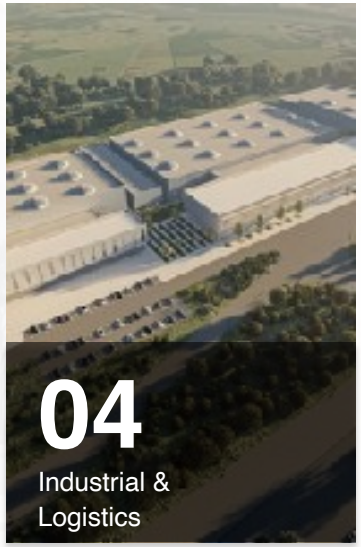
Sectors

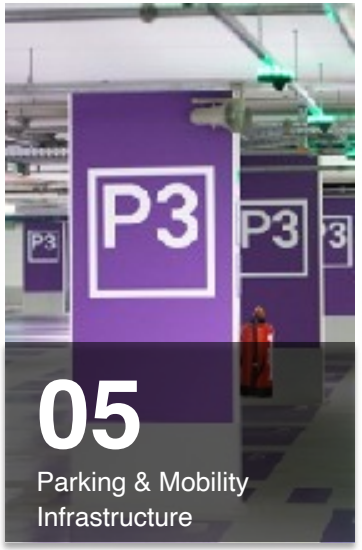
FOCUS·EXPERTISE·EXECUTION

01 **Build To Sell (BTS)**
02 **Build To Rent (BTR)**
03 **Hospitality**
04 **Industrial & Logistics**
05 **Parking & Mobility Infrastructure**
06 **Mixed-Use Developments**
07 **Alternative Assets**









Real Estate (BTS)

- Full development
- Flipping: purchase, renovation and sale
- Prime residential: coastal areas and core cities

Universis
Asset Management

Real Estate (BTS)

Specialized vertical focused on the development of prime residential projects in high-demand international markets, including full-scale developments and value-add residential repositioning strategies. The platform is primarily focused on coastal destinations and major urban centers with strong demand from international, European and high-net-worth domestic buyers.

The strategy is centered on **Buy-to-Sell (BTS)** developments, optimizing value creation from land acquisition through final unit commercialization, while maintaining asset-backed structures and disciplined execution throughout the project lifecycle.

Projects are typically structured through independent SPVs per development, with an average execution cycle of **3–5 years** and estimated gross return targets ranging between **18% and 35% annually**, depending on asset type and market conditions. Selected locations are characterized by high liquidity, strong absorption rates and controlled operational margins, with pre-sales frequently exceeding **60%** during early commercialization phases.

Core focus areas include **Costa del Sol, Costa Blanca, Madrid Centro, Mijas, Estepona, Marbella and Benidorm**. The aggregated pipeline includes medium and high-end residential developments such as:

- **320 apartments in Mijas**
- **40 villas in Marbella**
- **40 villas in Benidorm**
- **450 residential units in Málaga Capital**

Technical, operational and commercial execution is coordinated through senior development and management teams, ensuring cost efficiency, technical compliance, execution discipline and commercialization speed.

Key partners and managers involved across different projects and verticals include **CBRE, Universis Asset Management, TQ Eurocredit, Morph, Colliers, Gilmar, Savills, Metrovacesa, Constructora San José, Avintia and Bilba**, among others.

- **Estimated deployment volume:** €300M–€500M
- **Target annual ROI:** 18–35%, including asset appreciation and operational performance.

Strategic Operating Partners & Co-Managers

Real Estate (BTS-Residencial Prime)

Prime Residential Repositioning & Boutique Development

Specialized vertical focused on the acquisition, refurbishment and development of residential assets in consolidated, highly demanded locations with immediate access to premium services, strong connectivity and high market liquidity.

The strategy targets prime and ultra-prime districts in **Madrid** — Salamanca and Chamberí — **Barcelona** — Sarrià and Pedralbes — and **Málaga**, including the historic city centre and eastern coastline.
The objective is to reposition high-quality assets in prime locations and capture solid value creation through a hybrid approach combining **fast-cycle flipping** with **high-value boutique development**.

Operational Characteristics

- Focused investment in locations with strong **HNWI demand** and limited available supply.
- Mixed strategies combining **unit refurbishment and fast rotation** with bespoke luxury development.
- Structured financing: **60% senior debt, 30% equity and 10% institutional or private co-investment**.
- Average project duration: **12–16 months**, with centralized cost and timeline control.
- Planned exits through direct sales to end buyers or bulk sales to **REITs, family offices or institutional buyers**.

Strategic Managers & Partners

Active alliances with local brokers and family offices, including **Gacela Capital, Engel & Völkers Prime and Savills**.

- **Estimated deployment volume:** 30–50 M€
- **Target annual ROI:** 18-25%

Strategic Operating Partners & Co-Managers

Real Estate

(BTR)

Universis
Asset Management

Real Estate (BTR)

Specialized vertical focused on income-producing real estate assets with stable operational performance, designed to generate recurring rental income, long-term value appreciation and diversified real asset exposure.

The model is structured through dedicated SPVs by asset line or project type, incorporating long-term lease agreements, operational contracts, asset-backed structures and a strong focus on operational efficiency and cash flow stability.

The strategy includes multiple high-demand sub-verticals, such as:

- **Affordable and low-cost residential housing**
- **Flex Living and serviced apartments**
- **Tourist apartments and microsuites**
- **Self-storage and urban storage solutions**

Each segment is supported by strong structural demand drivers, evolving housing trends and increasing urban space constraints across major European cities.

The strategy is primarily focused on **Buy-to-Rent (BTR)** developments and operational real estate platforms, optimizing long-term appreciation while maintaining projects constantly backed by tangible underlying assets.

Projects are generally structured through independent SPVs grouping multiple assets, with average lifecycle horizons between **10 and 20 years** and estimated gross return targets ranging from **10% to 22% annually**, depending on the asset class and operational model.

Key Managers & Strategic Partners

Key managers and partners across different projects and verticals include **CBRE, Universis Asset Management, TQ Eurocredit, Urbanitae, Morph, Gilmar, Savills and Bilba**, together with specialized Flex Living operators and local tourist apartment and self-storage management companies.

Manager / Operating Partners:

- Bilba Constructora
- CBRE – Project Managment
- Gilmar
- Savills
- JLL
- Andersen
- Morph

All of them have extensive experience in the development and management of large-scale residential projects.

Manager / Operating Partners

- Estimated volume: €300–500M
- Target annual ROI: 10-22% including appreciation and performance.

Real Estate (BTR)

First Residence Housing, Affordable and Low Cost (Multiple SPVs)

- **Model:**
  - **Purchase + Renovation:** acquisition of units at €25–35k and basic renovation (total investment of €35–50k per unit).
  - **Rental Income:** €350–450/month (gross ROI of 8–12% annually).
  - **Scalability:** units divided into GROUPS OF 30 (target of up to 500 units).
  - **Locations:** university cities, capital cities and municipalities with more than 40,000 inhabitants.
- **Innovation:** conversion of commercial premises into residential units, leveraging flexible urban planning regulations.

ROI: 8-12%

PROJECTED ANNUAL RETURN

Real Estate (BTR)

Tourist Apartments (Flex Living) (Multiple SPVs)

- **Assets:** 7 projects located in strategic cities:
  - **Madrid:** 30 apartments (15–20% annual ROI).
  - **Málaga:** 100 apartments (estimated ROI of 15–22%).
  - **Benalmádena:** 45 apartments (ROI 15–18%).
  - **Córdoba:** 50 apartments (ROI 12–15%).
  - **Cádiz:** 30 apartments (ROI 14–16%).
  - **El Puerto de Santa María:** 25 apartments (ROI 13–17%).
  - **Jerez:** 17 apartments (ROI 10–12%).
- **Strategy:** focused on high tourism demand and contractual flexibility. Returns driven by premium pricing in central locations and professionalized operational management.

ROI: 10-22%

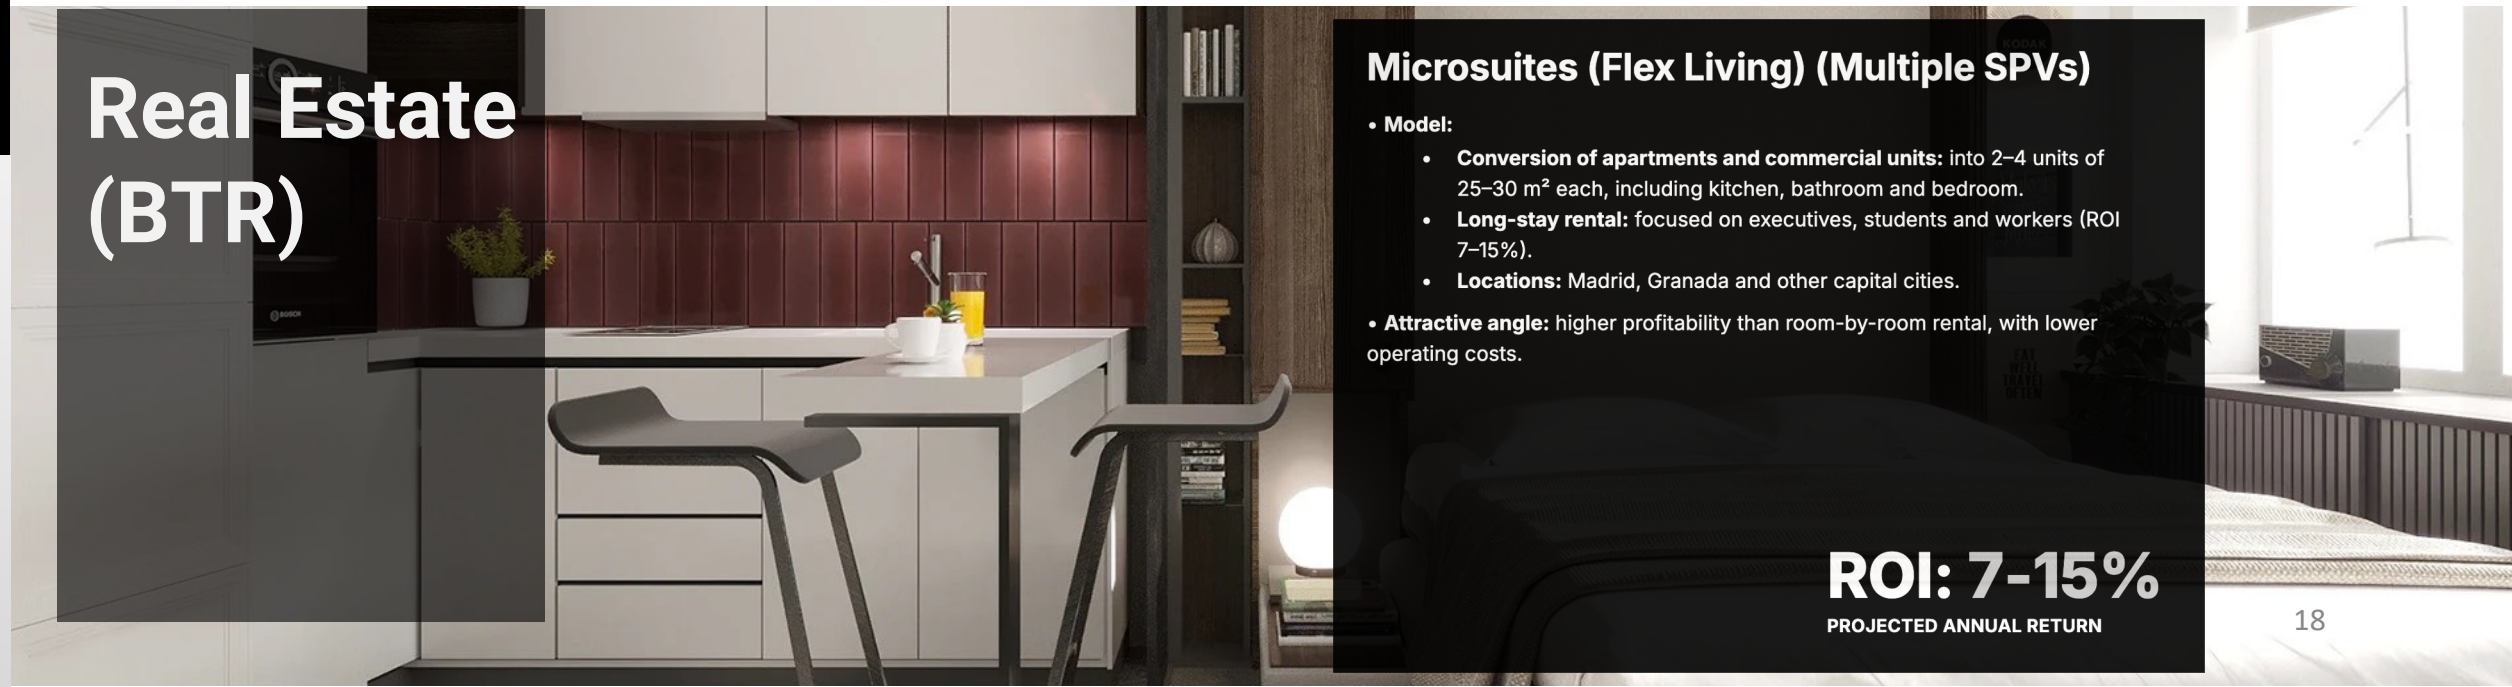
PROJECTED ANNUAL RETURN

Real Estate (BTR)

Self Storage (Multiple SPVs)

- **Financial Structure:**
  - **60% equity sale:** initial investment recovery for reinvestment.
  - **40% rental income:** recurring cash flows (growing annual ROI, up to 35% over 5 years).
- **Assets:**
  - **Prime locations and industrial warehouses:** cities with more than 40,000 inhabitants.
  - **Example:** an initial investment of €500k generates €175k annually in year 5.
- **Advantage:** low tenant turnover and stable demand in urban areas.

ROI: 6-35%
PROJECTED ANNUAL RETURN



Real Estate (BTR)

Microsuites (Flex Living) (Multiple SPVs)

- **Model:**
  - **Conversion of apartments and commercial units:** into 2–4 units of 25–30 m² each, including kitchen, bathroom and bedroom.
  - **Long-stay rental:** focused on executives, students and workers (ROI 7–15%).
  - **Locations:** Madrid, Granada and other capital cities.
- **Attractive angle:** higher profitability than room-by-room rental, with lower operating costs.

ROI: 7-15%
PROJECTED ANNUAL RETURN

Hospitality

Real Estate

Universis
Asset Management

Hospitality

Vertical focused on the **acquisition, development and operation of hospitality assets** in exclusive tourist destinations, through a residential investment model based on the sale of individual units to private investors, subsequently operated by leading 4- and 5-star hotel chains and hospitality operators.

This business line focuses on **premium beach destinations** — Mediterranean, Caribbean and Indian Ocean — as well as mountain locations with international appeal.

The model combines **branded residences, resorts, design micro-hotels and hospitality-driven residential assets**, where investors acquire individual units within professionally managed hospitality schemes operated under long-term agreements by internationally recognized hotel brands and operators.

Projects are designed with distinctive architectural integration and strong operational, wellness and sustainability propositions, aiming to generate high-value assets with attractive long-term returns, premium guest experiences and sustained operational performance.

Included models: beach hotels and resorts, condo-hotels, ski resort micro-hotels, branded residences.

Strategic partners: HVS, PKF Hospitality Group, JLL Hotels & Hospitality, CBRE Hotels, Colliers Hotels, RLA Global, Kerten Hospitality, Questex Hospitality, Universis, TQ Eurocredit and H. Ledesma.

Structure: turnkey acquisition of income-producing assets, with an SPV owning the asset and a long-term tenant/operator.

- **Estimated deployment volume:** 100-200 M€
- **Target annual ROI:** 8-13%, including asset appreciation.

Target Operators & Hospitality Brands

- Four Seasons
- Six Senses
- One&Only
- Rosewood
- Banyan Tree
- Mandarin Oriental
- Aman
- Kempinski
- Anantara
- The Ritz-Carlton, Jumeirah
- Capella
- Oberoi
- Explora
- Chedi
- Zannier Hotels
- Club Med Exclusive Collection.

Strategic Advisors & Partners:

Industrial

- Logistics
- Industrial Facilities
- Storage & Self-Storage

Industrial & Logistics

Specialized vertical focused on industrial real estate assets, including **logistics, storage and production facilities**. This line focuses on the development, acquisition and operation of strategically located industrial assets, including logistics platforms, distribution warehouses, built-to-suit production facilities and self-storage centers.

The model is based on **built-to-suit developments** for large industrial and logistics operators: land acquisition, turnkey development and long-term lease agreements with secured contracts ranging from **10 to 30 years**. Demand is supported by companies such as **DHL, XPO, Amazon, PepsiCo, LG, Decathlon, Costco and Lidl**, among others.

Assets are structured through dedicated **SPVs**, with optimized CAPEX, pre-agreed tenants and rental guarantees. The model also allows participation in upside potential through expansion, asset appreciation or future conversion opportunities, including **cross-docking, automation and tech-logistics**.

Long-term lease agreements are typically structured for **10–15 years**, inflation-indexed and backed by top-tier industrial and logistics operators.

Specialized managers and operators: CBRE Industrial & Logistics, Universis Asset Management, TQ Eurocredit, Colliers, JLL, Cushman & Wakefield, Prologis, Goodman, GLP, Panattoni, Mountpark, Merlin Properties, Logicor and P3 Logistic Parks.

Investment structure: direct acquisition or turnkey development of leased industrial assets through an SPV owning the underlying asset.

Manager / Operating Partners:

- DHL
- XPO Logistics
- DB Schenker
- DSV
- FedEx
- UPS
- Maersk Logistics
- Amazon

- Pirelli
- Caterpillar
- John Deere

Manager / Operating Partners:

- **Estimated deployment volume:** 150-300 M€
- **Target annual ROI:** 8–10%, with potential upside through operational efficiencies and partial asset repositioning.

Mobility Infrastructure

- Automated Parking Systems (APS)
- Smart Parking Systems

Universis
Asset Management

Mobility Infrastructure

Specialized vertical focused on smart urban mobility infrastructure, centered on the acquisition, development and operation of high-efficiency automated parking systems.

The strategy is aligned with municipal sustainability and urban digitalization plans, incorporating remote management systems, access control, IoT sensors and integrated digital platforms.

The model is primarily oriented toward public concession structures or long-term usage agreements with private property owners, prioritizing high-density urban areas with strong demand for traffic decongestion and parking optimization.

Projects are structured through dedicated SPVs owning the infrastructure and underlying assets, combined with operation by specialized managers under fixed-income, revenue-sharing or rotation-fee models.

Assets are backed by robotic parking infrastructure and long-term operational agreements ranging from **15 to 25 years**.

Key managers and partners: Universis Asset Management, TQ Eurocredit, CBRE, Colliers, Savills, Deloitte and JLL.

Structure: acquisition and operation of parking infrastructure units with long-term technical support, including potential co-investment with specialized operators or integration with public parking management platforms, while maintaining ownership and control over the underlying assets.

- Indigo España
- ParkingNet Systems

Manager / Operating Partners:

- **Estimated deployment volume:** €100M–€300M
- **Target annual ROI:** 8–14%, including asset appreciation and operational performance.

Retail

- Commercial Units
- Prime Urban Retail Units
- Shopping Centres
- Retail Parks

Universis
Asset Management

Retail

Vertical focused on the commercial real estate sector, which continues to represent a strategic pillar within real estate investment, supported by strong demand for prime retail spaces in both city-center locations and major shopping destinations.

The management team, with more than **40 years of experience** managing assets for major international brands, maintains direct access to leading companies such as **Mercadona, LG, DHL, PepsiCo, Inditex, Carrefour, MediaMarkt, Leroy Merlin, Decathlon, Apple, Samsung, Amazon, Nestlé, Coca-Cola, Unilever and Procter & Gamble**, among others.

The vertical is supported by asset-backed structures and operational agreements with average terms ranging from **10 to 15 years**.

Key managers and partners: CBRE, Universis, TQ, Urbanitae, Colliers, Savills, JLL, Cushman & Wakefield, BNP Paribas Real Estate, Bilba or equivalent partners.

Structure: turnkey acquisition of income-producing assets through SPVs owning the underlying asset and leased to long-term tenants. Additional upside may be generated through the repositioning of underutilized areas into passive-income-generating spaces and through turnover-indexed lease structures capable of increasing ROI above **12%**

- **Estimated deployment volume:** €100M–€300M
- **Target annual ROI:** 8–14%, including asset appreciation and operational performance.

Integrated Platform Structure & Governance Framework

Universis Asset Management is the shared platform through which specialized companies, senior operators and institutional advisors coordinate their capabilities across real estate, infrastructure and project execution.

Rather than a standalone operating company, Universis Asset Management is structured as an integrated platform combining development expertise, technical execution, legal structuring, financial advisory and project-level management capabilities.

The platform brings together core governance participants and strategic execution partners under a coordinated operating framework designed to support disciplined underwriting, institutional oversight, operational control and scalable project delivery.

The result is an integrated governance and execution framework designed to align specialist expertise, project-level accountability and institutional discipline across the full lifecycle of each opportunity.

Palacio Mayor Madrid.

Palacio Mayor Madrid has been conceived to become one of the future **ultra-prime branded residence landmarks** in the capital, inspired by the residential and hospitality model developed by international operators such as **Ritz-Carlton**.

Located within Madrid's new **luxury axis**, close to **Galería Canalejas** and leading international hospitality brands, the project combines **architectural heritage**, **premium repositioning**, and **structural scarcity** in one of Europe's most resilient residential markets.

The growing international demand for **branded residences** and **luxury serviced living** has consolidated Madrid as one of Europe's leading destinations for **wealth preservation** and **international capital**.

Our group of **long-term Mexican private investors** provides access to a market with **strong absorption potential** for this type of ultra-prime asset.

05 Hospitality
06 Golf
07 Leisure / Sportainment
08 Lagoons / Resort
09 Beach Club
10 Retail / Nightlife

City of Stars.

City of Stars has been conceived as one of the largest **master-planned lifestyle districts** currently under development in the Caribbean, integrating more than **11 million sqm of land** dedicated to **residential, hospitality, sports and entertainment** uses.

The project will combine more than **100 premium villas**, **4,000+ residential apartments**, and **10,000+ hospitality-condo and branded residence units**, supported by a unique amenity ecosystem designed to drive **international attraction, residential absorption and structural land value appreciation**.

The development's main demand catalyst will be an **MLB-ready stadium** with capacity for up to **60,000 spectators**, together with a **sports city, surf park, golf, beach club, retail & entertainment districts**, backed by **David Ortiz** and an international ecosystem of celebrities and MLB players with an estimated combined reach of **20–35 million global followers**.

The model replicates international **destination creation** strategies, using **sports, lifestyle and entertainment** as demand catalysts to consolidate one of the Caribbean's most ambitious future urban and tourism hubs.

Atlante.

Atlante was created with the ambition to redefine the concept of vertical living in Galicia, bringing to A Coruña a premium residential model inspired by leading international residential towers, where **privacy, views and spaciousness** replace the traditional concept of an urban apartment.

With more than **100 meters in height** and **34 residential levels**, the project has been conceived under the philosophy of **"villas in the sky"**, combining large-format residences, panoramic terraces and sculptural architecture designed to transform A Coruña's skyline with a unique residential landmark in the Galician market.

Its elevated position, open views over the **Atlantic Ocean** and the scarcity of comparable product make Atlante a highly differentiated asset within a city characterized by a very limited supply of new premium residential product.

Beyond its architectural component, Atlante represents a commitment to creating one of Northern Spain's future residential icons, targeting **wealth-preservation buyers**, high-end replacement demand and profiles prioritizing **exclusivity, design and urban quality of life**.
